

# SUCCESS STORY

Please share with us any wins or gains that you or your child have experienced in our office.

Recently I was informed by Dr Callis that my grandson would need to have caps put on his teeth because of the cavities he had in between his molars top and bottom. We were really concerned and he was a bit scared. The entire team put us at ease and explained the procedure would be done at the SugarLand Surgery Center. Dr Ben Villalon performed the ~~proe~~ surgery ~~at~~ and my grandson (only 6 yrs old) did wonderful. When he woke up from the surgery he was a bit groggy but within 30 mins he was doing fine. He has no memory of any pain. He still loves Dr Ben and is happy about his caps.
